Grants and Contracts**

## Message from the President

Once again, Hunter's scholars and researchers have achieved a new level of success in attracting grant and contract awards for their cutting edge work. In Fiscal Year 2003 we reached an impressive total of \$40.77 million for projects led by Hunter College faculty and staff, an increase of 8%.

With these funds, Hunter College faculty and staff advance the knowledge and thinking – and break new ground – in their fields. Hunter's researchers have an excellent record in basic and applied research, and collaborate with faculty from the nation's leading research universities. They serve on review panels for federal agencies and, perhaps most important, transmit their enthusiasm for learning and inquiry to our students.

The breadth and high level of Hunter's expertise is demonstrated by the range of funding received to develop programs and implement training projects, not only in the liberal arts and sciences, but also in the preparation of counselors, educational administrators, teachers, health and mental health professionals, nurses and social workers.

We congratulate everyone at Hunter whose strong commitment to research, scholarship and teaching helped to establish this new benchmark.

Jennifer J. Haab

### Opening Remarks

A record number of faculty submitted proposals in the 2002-2003 academic year, and the results were outstanding. Hunter faculty and staff were awarded the largest number of grants and contracts in the College's history. A total of 475 awards were received from federal, state, city, and private agencies surpassing the \$40 million level.

Grants and contracts bring vitality to the College. The success of the members of our faculty demonstrates that they are in step with the latest findings in research as well as practices and techniques that translate to the classroom and laboratory.

Most members of the Hunter community are aware of the importance to Hunter students of training grants, which are frequently accompanied by scholarship support or stipends. It is not generally known that our grants provide more than 250 jobs to students.

We acknowledge everyone who develops ideas and writes proposals and who serves on the various review committees in government, the private sector and within the City University of New York. We also salute faculty and staff who serve on Hunter's Institutional Review Board, the Institutional Animal Care and Use Committee, and the Institutional Biohazards Committee. Their service is greatly appreciated.

## Director's Remarks

Fiscal Year 2003 showed a continued upswing in Hunter grants and contracts. While being directly awarded \$40.77 million by sources outside the City University system, Hunter continued to participate in various projects within the University for which it received more than \$3.57 million, bringing the overall total to \$44,346,615.

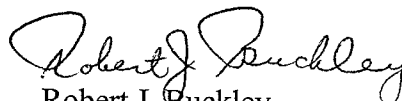

Some of the highlights of 2002-2003:

- ◆ Within a period of three weeks, we were notified of three CAREER awards for junior faculty in Biological Sciences, Chemistry, and Computer Science.
- ◆ Faculty members from Anthropology and Film & Media Studies became MacArthur Fellows, and one of them also received an NEH Fellowship.
- ◆ Two Javits Fellowship recipients (grants sponsored by the U. S. Education Department) chose to do their graduate work in Art and in Creative Writing at Hunter.
- ◆ A Physics faculty member was recognized in a White House ceremony for mentoring students.
- ◆ A major international scientific conference on birdsong was held at Hunter with support from two federal agencies.
- ◆ New initiatives in the areas of HIV research and on environmental health issues received support.
- ◆ The Center for Puerto Rican Studies collaborated with other CUNY schools in a major study.

The outlook for 2003-2004 is also quite good. As we prepare to "go to press," just in the last month (mid-February to mid-March, 2004):

- ◆ A senior faculty member was notified of a high score on a new proposal he had recently submitted – the likelihood is that a four-year research grant will result.
- ◆ Two junior faculty members became recipients of nationally recognized fellowships.
- ◆ Another junior faculty member received an award notice for a five-year grant from the National Institutes of Health for a research project.
- ◆ Within a week, faculty members were featured in **The New York Times Science Times** and on NBC's *Today Show*.

These events point up the excellent work being done by our faculty and staff.

# SECTION I-A: OVERVIEW OF EXTERNAL FUNDING

This section contains statistical information on grants and contracts from external sources, i.e., agencies for Federal, State and City government, foundations, corporations, and non-profit organizations. For the sake of making comparisons, figures are given for the quarter century beginning July 1, 1978.

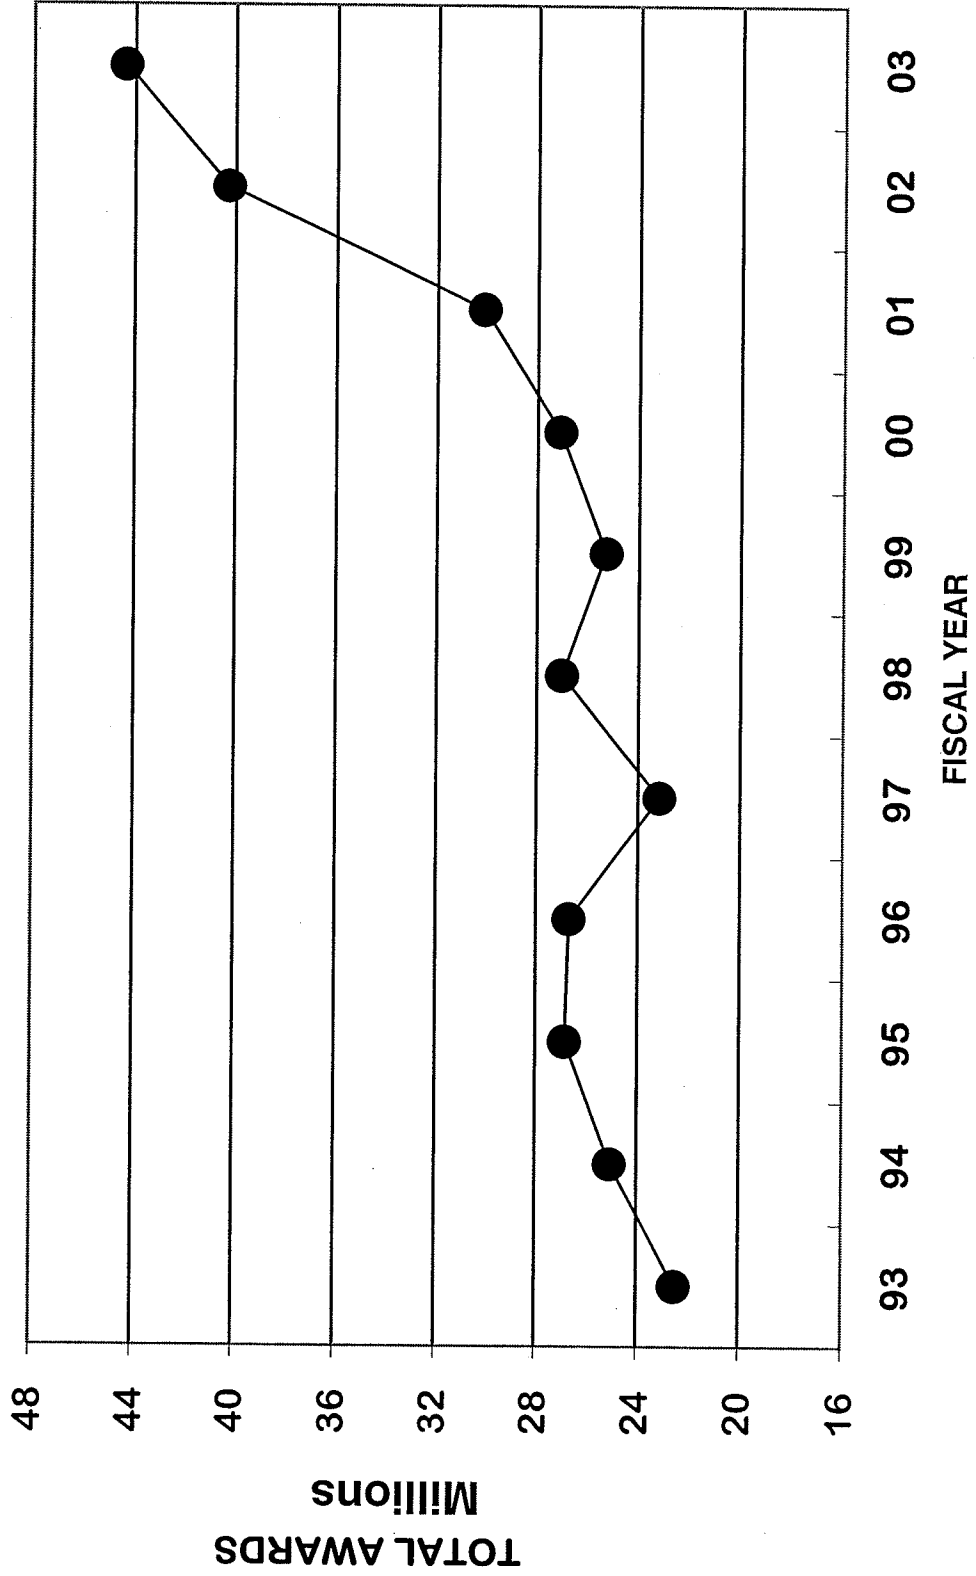

Grants and contracts have undergone remarkable growth since the late 1970s. Viewing awards in ten year increments, we used 1983 as the initial base year to illustrate growth.

## **SECTION IB – Individual Project Listing**

This section lists the individual projects that comprised the grants and contracts sponsored by external sources during fiscal year 2003 (July 1, 2002 – June 30, 2003). Also included are grants made directly to individuals (e.g., fellowships), but these figures are not included in the previous section's overall statistics on institutionally administered awards. In several cases, Hunter faculty have co-principal investigators at other institutions or serve as project associates to principal investigators at other CUNY schools. We generally only count the portion available to the Hunter collaborator.

Awards are arranged alphabetically by academic and administrative regions. Within that framework, awards are organized first by department and then by faculty member. Entries include the name of the funding agency and, when applicable, the agency identification number and remarks. Among other data shown are the Research Foundation account number and the award period. Type indicates whether the award is new, a continuation (i.e., non competitive but contingent on sufficient progress having been demonstrated to warrant continued funding), a renewal (after competitive review of an ongoing project), or a supplement (additional funding to complete or extend the scope of the original project). When applicable, the status gives the length of the project in years and whether the agency has indicated its intention to continue funding on a non-competitive basis beyond the current period.

The projects are listed as follows:

# **SECTION I-C: PROPOSAL SUBMISSIONS**

The count of proposal submissions includes:

- a. proposals for new funding;
- b. proposals submitted at the end of a funding cycle for review in competitions for renewed funding;
- c. progress reports which, although not competing with other applicants for funding, must demonstrate sufficient advancement towards the project's goal in order to gain the funding authorization for another year of support.

Identical or similar proposals submitted to more than one agency are counted separately. Preliminary and final proposals prepared for the same agency are included only once.

In fiscal 2003 Hunter College had 651 submissions. Some statistical information and the listing of individual faculty and staff applicants are shown in this section. A record 270 individuals worked on proposal for external funding this year.

*Some applicants submit the same proposal to more than one agency - these proposals are counted separately.  
Others submit different proposals to one or more agencies.*

*The terms "Principal Investigator" and "Project Director" are used to signify successful applicants, i.e., persons who receive awards. Many faculty members direct more than one project.*

*Shaded numbers highlight the years in which records were set for the respective categories.*

*As agencies frequently take 6-12 months to complete the review of a proposal, approximately half of the proposals submitted in one fiscal year do not have a final determination until the next year.*

# **PART II: INTERNAL FUNDING OF PROJECTS**

A wide range of other projects received support from College and University funds.

This part is divided into two sections:

**Section II-A** PSC-CUNY Research Award Program

**Section II-B** Other Internal Support

**SECTION IIA – PSC-CUNY Research Award Program**

The Board of Trustees of the City University of New York and the collective bargaining agent for the instructional staff, the Professional Staff Congress (PSC), demonstrate their recognition of the importance of encouraging research activities in the CUNY system by funding a competitive research award program. Applicants for the most recent competition could request a maximum of \$10,000 for research support. Proposals are peer reviewed by one of more than 30 disciplinary panels.

In the 34 years of the PSC- CUNY Research Award Program, Hunter College faculty and staff have been awarded 2,172 grants for more than \$11.1 million. Grants are designed to encourage research and sometimes serve as pilot and seed money for larger endeavors.

The following pages of this section gives a statistical history of the participation of Hunter faculty in the program since its inception. The individual project listing for this year follows. Awards are arranged by academic region and may be found as follows:

Hunter College and the City University of New York make grants to and recognized achievements of numerous Hunter faculty and staff. Among the programs providing the funds were:

1. The Shuster Faculty Fellowship Fund, established in honor of the late former Hunter College President, George N. Shuster
2. CUNY Diversity Fund
3. City University grant competitions
4. Hunter Library Competitions

Awards are listed by academic region on the following pages:

**PART III: OVERALL SUMMARY OF PROJECT SUPPORT**

Grand Total of External and Internal Funding

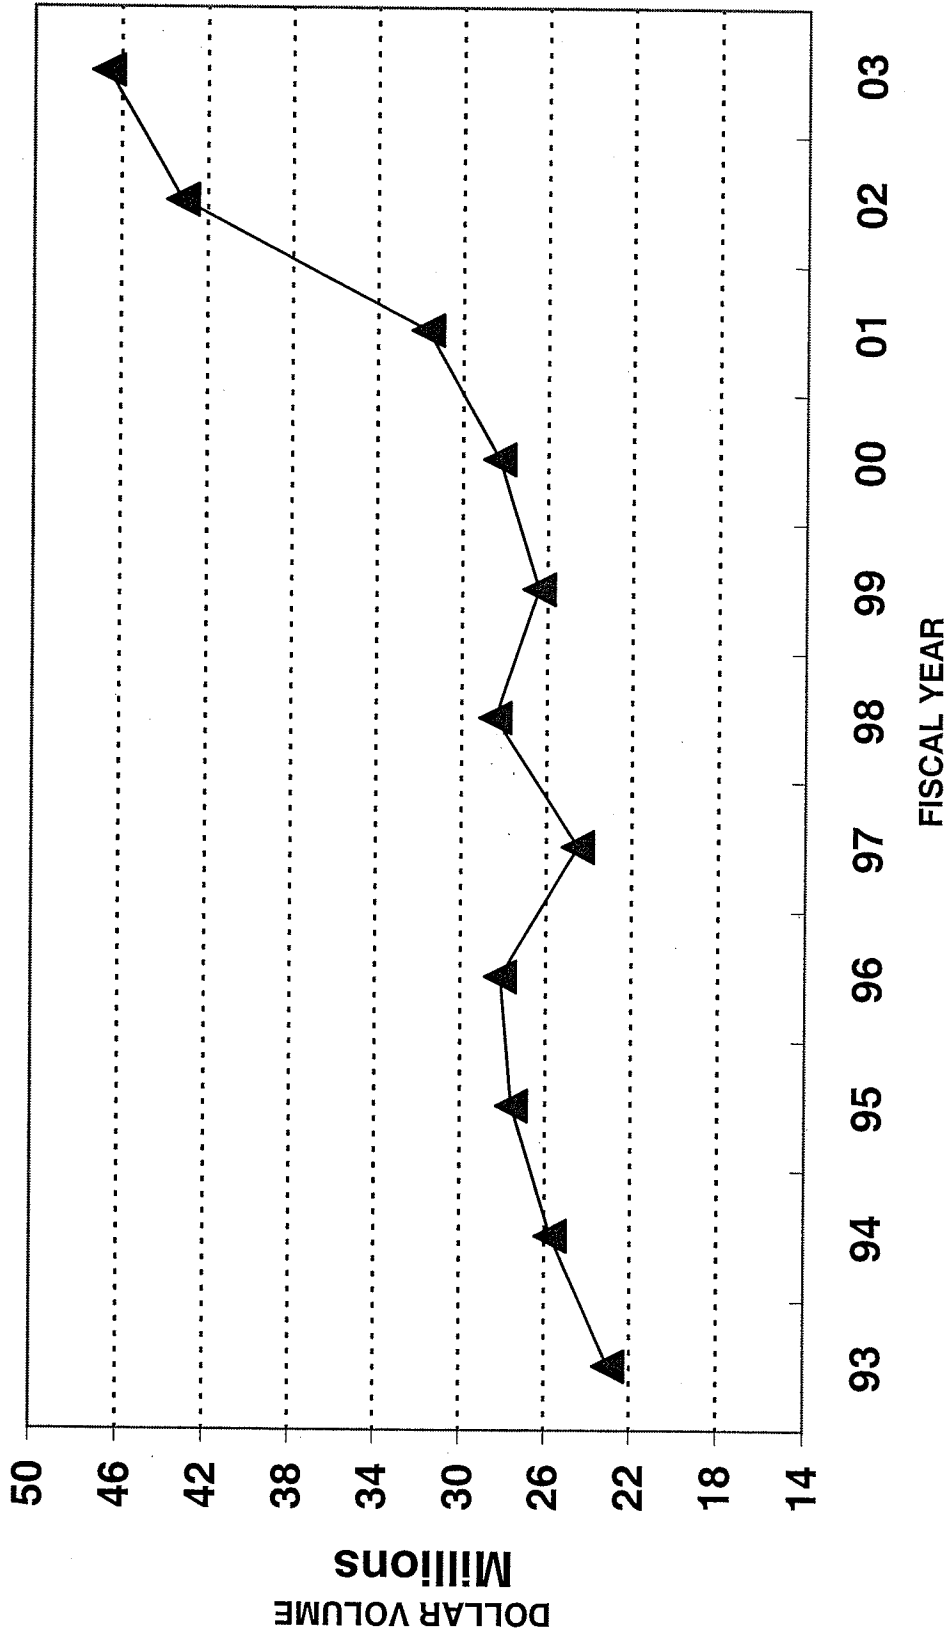

# **OVERALL SUMMARY OF PROJECT SUPPORT**

At the conclusion of this report, we present statistical tables incorporating various award data available for the last quarter century. The information in this section includes the external awards detailed in Section I-A and I-B of this report, plus fellowship and other grants not administered through Hunter, the PSC-CUNY Research Award Program (Section II-A) and other internal support (Section II-B). The intent here is to present as broad a picture as possible of the support obtained by faculty and staff. This section shows the tremendous growth of project support over the past 25 years.
